# EDITOR'S PICKS

EDITOR-IN-CHIEF MARC ATIYOLIL SHARES SOME OF HIS FAVORITE PRODUCTS.

The combination of a matte white lacquer finish with rich black walnut details gives the Vanité a luxurious, contemporary look. I love that this bathroom vanity offers plenty of storage space with full extension, 6.5" deep drawers and high performance Blum push-to-open slide mechanisms to allow for a trendy, handleless design. If space allows, there is also a double sink version! - Design Market, [www.designmarket.com](http://www.designmarket.com)

Ready to meet your new favorite table? The Plurimo is an entirely new concept in extension tables. My favorite design aspect is that it uniquely expands in both width and length with hidden extensions and self-storing leaves. There is no need to take up room in your closet for your table leaves. I love that it's available in five sizes and in a variety of lacquer, wood, and heat and stain resistant, sealed concrete finishes. - Resource Furniture, [www.resourcefurniture.com](http://www.resourcefurniture.com)

Luxury Vinyl Tile is a great choice if you are looking for an affordable, durable flooring option. The Malibu collection from 4 Corners offers a variety of trendy colors. My favorite is this Belize color that looks fantastic in a light and bright, modern kitchen. This easy to install flooring option is very low maintenance and can withstand the wear and tear of a busy kitchen. - 4 Corners, [www.4corners.ca](http://www.4corners.ca)

## ORGANIZED CLUTTER

### HOW DO YOU DETERMINE THE BEST STORAGE CONFIGURATION FOR A CLOSET?

Your STOR-X designer is going to ask you what the closet will be used for. A walk-in closet will be configured differently from a linen closet that simply needs to accommodate towels, sheets and blankets. The same goes for storing games and toys in the family room, cleaning supplies in the laundry room, or coats and hats, boots, and umbrellas in the mud room. Every storage space will be custom designed to suit its specific purpose.

Before your designer arrives, make sure you think about how you want the space used. As an example, glamorous walk-in closets are no longer just for the ladies, men like them too! If you must share your closet, your designer will ask you questions about each of your priorities – from preferred height of the shelving and hanging rods to accessories such as tie racks, belt racks and a jewelry drawer to ensure your space within the closet is a perfect fit for you.
